WHAT IS DIAMOND WATER ?

It is spring water which has had its vibrational rate accelerated; this allows it to access higher Life and Intelligence, making it available to respond to the user's intentions.

The technology used to transform this spring water uses the science of numbers as well as music, which is living geometry based on sound. The end result is an encoding device which permits the recording of multi-dimensional codes; these transform the spring water into a receiving medium which then captures higher energies.

When you verbalise intentions to bring you relief, well-being or the resolution of your challenges, you can now record these intentions within the medium of Diamond Water. When swallowed, the Diamond Water associates your spoken intention directly with the corresponding memory of opposite polarity held in your subconscious (the body cells). The activity of the Diamond Water then elevates both the opposite poles concerned until they vibrate at a much higher frequency. This induces a neutralising energy which transforms and resolves these conflicting opposites.

Diamond Water, which is represented by the number 999, brings human beings to a point where they can integrate the Third Level of Consciousness, known as "the Consciousness of the Tree of Life". This allows them to progressively release the Second Level of Consciousness, known as "the Consciousness of the Tree of Good and Evil". Here we are concerned with the Tree of Life with its twelve

kinds of fruit, referred to in Revelations 22: 1-2. The twelve kinds of fruit are in fact the twelve chakras of man, finally re-activated by the integration of that Consciousness where opposing poles no longer confront each other, but rather complement each other producing a Third State at Point Zero. Man thus becomes that Place where the uninterrupted flow of light energy pours through a physical body which becomes an ever greater "supra-conductor".

This Diamond Water is feminine by nature and designed to receive impressions. It cannot be defined using masculine terms such as strength or efficiency but rather in terms of "loving and wise responses".

The strength of this water resides in its response to the "sacred verbalisation of our intentions" (see ALCHEMY OF THE HUMAN SPIRIT by Kryon, French edition by Ariane, Quebec, p.266). Diamond Water is virgin - nothing is recorded in it. Only when you vocalise your intentions through the heart - which purifies them - will you impress them upon this strongly responsive medium. The results will depend directly on what you imprint upon the Diamond Water medium *and the degree of emotional charge behind it.*

Diamond Water's level of consciousness operates beyond the fourth dimension. In effect, positive - negative polarity does not exist at this level. If anyone attempts to measure this level of consciousness and its activity on a dowser's scale (or any other calibrated scale), the only thing measured will be positive or negative output resulting from the dualistic memories of the user, as re-transmitted by the Diamond Water.

The best way of appreciating Diamond Water is to use it on yourself and verify your own results.

You can reproduce and distribute Diamond Water at will; please feel free to do the same with this text. To reproduce Diamond Water, pour 100 ml (millilitres) of it into an empty 1-litre bottle.

Add still spring or mineral water until the bottle is full.

You will always need a minimum 10% of Diamond Water in a new mixture to ensure that the transformation takes place. For one litre, allow minimum 1h1/2 hours for the transformation. For bigger

quantities it is best to mix before retiring: the new Diamond Water will be ready for you in the morning. With a litre you can then make 10 litres and so on. *Don't forget to retain 10% of what you mix so you can make the next batch.* This water is one of many new products announced by Kryon (**DON'T THINK LIKE A HUMAN**, Book 2 pp 143-144, French edition from Ariane, Quebec).

Diamond Water made from spring water will serve not only for your personal growth intentions, but also as excellent drinking water. You can always add a simple intention such as "I intend digesting this meal with ease." You can, however, also add Diamond Water to tap water (faucet water) and use it for cooking. In this instance, the intention could be "I intend this food to yield its natural flavours and nutritive value fully to all who eat it" - results can be striking! Feel free to use it in humidifiers, sending forth the intention that it raise the vibrational level of the room=s atmosphere; the same can be done with a bowl of water in any room. If you have no particular intention, Diamond Water will in any case have a beneficial effect on your physical health and psyche.

SIMPLE HINTS :

- State your intentions out loud *with firm conviction*.
- When fighting an uphill battle, it helps to repeat this process at least 4 times a day.
- When applying Diamond Water externally to irritations or painful areas, for best results mix with a natural ointment *after verbalising an intent* and then apply.
- You can use Diamond Water with the intent of improving relationships & your work life.
- Intentions for improved health, blossoming happiness, love and satisfaction are key necessities for the body; as it is the soul's instrument, the body needs and merits such attention.
- You can issue the intent to cleanse and protect your subtle bodies from the psychic and emotional pollution which they are exposed to daily.

- If you so desire, the harmful effects of alcohol and chemical ingredients will be very effectively neutralised.
- Don't forget your domestic plants and animals.
- When you can, please pour some Diamond Water into springs, lakes, rivers, swimming pools, dolphinariums etc. The ocean benefits, even from small quantities, over time. Wherever whales and dolphins swim is important: they themselves have requested this help.

Feel free to innovate and live these experiences to the full - you will be the first to benefit.

DIAMOND WATER IS PART OF A WAKE-UP PLAN FOR YOUR CONSCIOUSNESS. I HAVE BEEN ASKED TO MAKE IT AVAILABLE FREELY AS A LOVE OFFERING: IT WILL ITSELF COMPENSATE YOUR OWN EFFORTS TO UNDERSTAND YOURSELF AND THE MIRRORS LIFE HOLDS UP TO YOU.

How It All Started :

Joel Ducatillon is fifty, self-taught and comes from France. As a teenager he discovered a spontaneous ability to help others with physical ailments. After accumulating experience in several different fields he became a Naturopath, eventually using a variety of energies to help people find their chosen inner path. Seven years ago he gave up his extensive Practice and embarked on an inner search using contemplative listening, followed by detailed execution of all that he received in the Silence. He takes up the story:-

Seven years ago my guides in the unseen advised me to cease all previous activities, to withdraw into the Still Mind and there discover something hitherto unknown. After a series of contemplative meditations it came to me in a dream that I had to manufacture a new type of apparatus. It would be an encoder, something which would enable people to accelerate the overcoming of their inner blockages.

For the next two years I worked on my own blockages; each time I worked one out, I would receive a new part of the puzzle in meditation. I was asked to familiarise myself with the basics of quantum physics, previously unknown to me. When all the details were in place two years later I conceived the nature of this tool: it was to be a sealed

glass cylinder. The 1996 prototype was perfected end 1997. Using a simple particle accelerator or cyclotron mechanism, I focused a series of energies, including sound, within it; this created a core of Krypton, a heavy gas, within the cylinder. Krypton memorises all that is transmitted through it. This then was the basis to be used for encoding some 850 different mathematical, geometrical and musical formulae within the sealed unit. This second stage, where each code had to be discovered and then implanted, took the better part of three years (much of this work is done through sound transmission, using a synthesiser). These codes resemble the coded information found within human DNA strands. The tool is thus called DNA 8.5.0.

The basic apparatus measures 5 cm x 3 cm and when placed in a glass of water will, after 1h1/2 hours, produce an altered structure and vibrational rate within that body of water. I have called the water concerned "Diamond Water."

Diamond water has the ability to reproduce its structure and vibrational rate indefinitely, provided the simple guidelines. My guides have explained that, in the Diamond state, water becomes both fully intelligent and fully loving. In this state, it acts as a translation medium for the user who is consciously pursuing his own path to the Light. It cannot be misused. Its use is simple. The user holds a glass of Diamond Water in his hands. He then clearly states his intention - out loud - to understand or resolve a given challenge and speaks unequivocally from the heart. Clairvoyants have then observed that the user's Solar Chakra emits a series of frequencies which are received by the Diamond Water, causing them to appear as series of tiny, coloured bubbles of Light within the water. They represent the user's intentions in terms of pure energy.

As I understand it, the intentions are transmitted into the medium of the Diamond Water and then encoded. The user then drinks the Diamond Water. It is my belief that the water carries these intentions into the intronic zone of the user's DNA strands.

Following extensive use of this simple method both by myself and many others, experience leads us to confirm an accelerated resolution of problems which were caused by blockages contained within the user=s cellular memories. When these individual challenges are addressed consciously to the Diamond Water, with the intention of resolving them, the mechanism of resolution is set in motion on a level which cannot be interfered with. When we consciously ask the Diamond Water to accelerate the erasing of the subconscious memories which trigger a given problem, these hidden trip-mechanisms, which block relationships and all kinds of situations, are effectively defused.

This method allows an increasingly rapid reduction in the level of burdensome cellular memories. It thus allows a shift in the balance of the struggle between the Soul and the human ego, progressively allowing the Soul to regain its rightful dominion over the ego.

My personal feeling is that Diamond Water is now contributing to the supply of energy which is increasingly feeding the Human Consciousness Grid. As it can reproduce itself indefinitely, I believe that its effect will rapidly become exponential.

I have also produced a slightly larger glass cylinder. Once Diamond Water (which is specifically for human consumption) has been produced by the smaller cylinder over a twelve-hour period, this can be removed and replaced with the larger cylinder, also for a 12-hour period of its own. The larger cylinder then adds a second series of codes to the water which becomes specific for consumption by vegetal entities. I have simply called this Diamond Vegetable Water. It reproduces itself in exactly the same way as Diamond Water. It can be used upon anything from household plants to trees and its cumulative effect will, I believe, benefit the Collective Vegetal Consciousness Grid of the Planet.

My guides led me to understand, quite early on, that this research was being accomplished within the conscious energy field of the Apostle John. Much later I became aware of the link between my research and certain statements in the Apocalypse; notably Revelations, chapter 22 verses 1-3.

Notes :

- 1. The apparatus contains a repetitive sequence of 2 notes in the following proportion: 24 / 25. This is the underlying harmonic of our Cosmic Universe.**
- 2. It also contains the 144 codes of the Hebrew language.**
- 3. When in action, the tube was observed by a clairvoyant to contain a cylinder of golden light, surrounded by a twirling spiral of golden light. A Torus?**
- 4. When researching your inner blockages, it may help if you request the active assistance of that great soul known as MOTHER: She worked for many years with SRI AUROBINDO and her energy has inspired and overlighted this work.**

IN THE REPRESENTATION BELOW :

- 5. STEEL** represents a combination of two of Life's building blocks: iron and carbon. They are represented in the steel ring placed around each cylinder as it is programmed. This ring is used as an oscillating circuit; it thus acts as particle accelerator, inducing the precipitation of Krypton gas within the glass tube. This process is accompanied by a specific mantra.
- 6. STAELHE** has no known meaning. Its enunciation is, however, associated with the channelling of certain incoming stellar energies.
- 7. STORM** represents the "cyclonic" spiral of golden light observed in action within the glass cylinder once it has been programmed.
